[Video Reviews ↗](#)

General Info

Years of Production	2023 -
Available in the USA	Yes
Country of Manufacture	USA
Current Status	Produced
Body Style	Pickup
Price Europe (New/Used)	€No data/No data

Range and Efficiency

Range EPA	505 km
Range WLTP	No data
Range GCC	480 km
Battery (Usable/Nominal)	173/184 kWh
Efficiency (Energy/Range)	36 kWh/100 km
Efficiency (Range/Energy)	2.77 km/kWh

Charging

Architecture	800 V
Max AC Charging	19.2 kW
Max DC Charging	300 kW (150 kW at 400 V)
Charge Port	CCS Type 1

Performance

Drive Type	AWD 3 motors: PMSM (front), 2 PMSM (rear)
Motor (Power/Torque)	619 kW (830 hp)/15592 Nm
Acceleration 0-100 km/h	3.7 s
Top Speed	180 km/h

Dimensions

Length	5507 mm
Width (with Mirrors/no Mirrors)	2380/2201 mm
Height	2009 mm
Wheelbase	3445 mm

Cargo and Towing

Number of Seats	5
Curb Weight	3975 kg
Cargo Volume (Trunk/Max/Frunk)	1040/No data/320 l
Towing Capacity	3856 kg

About GMC Hummer EV Pickup 3X Standard Range (2023-...)

The GMC Hummer EV Pickup 3X Standard Range (2023-...) is an all-electric all-wheel drive pickup. It came out in 2023.

The GMC Hummer EV Pickup 3X Standard Range (2023-...) has a 184 kWh battery pack, allowing it to travel up to 480 km on a single charge. The car has an average efficiency of 36 kWh per 100 km (or 2.77 km per kWh) — ranked №162 out of 820 electric vehicles.

How powerful is it? How fast does it accelerate?

The GMC Hummer EV Pickup 3X Standard Range (2023-...) is equipped with a powertrain that delivers up to 619 kW (830 hp) of power and 11500 lb-ft of torque.

This enables a 0 to 60 mph acceleration in 3.5 seconds (№18 out of 116 ranked positions, among 820 electric vehicles, with some cars sharing positions) and a top speed of 112 mph.

While the Hummer EV's mud-terrain tires excel in off-road conditions, their 106 mph speed rating may be a limiting factor for those who enjoy high-speed driving. Standard all-season tires raise that limit to 112 mph.

How far can it go on single charge? What is the real-world range?

The estimated real-world range for GMC Hummer EV Pickup 3X Standard Range (2023-...) is 298 miles, ranking it №70 out of 249 ranked positions. Several conditions can influence this range:

- Speed: The battery drains faster at higher speeds.
- Temperature: Extreme temperatures can impact range.
- Terrain: Range is reduced on hilly or mountainous terrain.
- Driving style: Aggressive driving behaviors, such as frequent acceleration and braking, decrease efficiency.
- Feature utilization: Climate control and media system usage also affect range.

These figures are approximations, and your actual driving range may vary. When planning trips, consider these factors and be prepared for potential charging stops.

For trip planning assistance, utilize the [EV Navigation interactive map](#).

Opting for the Extreme Off-Road Package, with its aggressive mud-terrain tires, offers unparalleled off-road performance but may result in a minor reduction in range (≈-5%).

What charging options are available? How long does it take to

charge it?

The GMC Hummer EV Pickup 3X Standard Range (2023-...) in the USA is equipped with a CCS Type 1 charging port. You can charge it conveniently at home using a standard outlet, or utilize any public AC charging station with the appropriate cable. However, the car's built-in charger (inverter) limits the maximum AC charging speed to 19.2 kW, which translates to roughly 30 miles of range added per hour.

For faster charging, use DC fast-charging stations. The GMC Hummer EV Pickup 3X Standard Range (2023-...) supports a maximum DC charging rate of 300 kW, but it's important to note that battery temperature and current charge level can affect the actual charging speed you'll experience.

To estimate charging time, rate, and cost, you can use [EV Charging Calculator](#).

Prior to the 2024 model year, Hummer EVs were equipped with a 11.5 kW onboard charger, which couldn't power external devices (V2L). Please note that due to its 800V architecture, the Hummer EV's charging speed is limited to 150kW at 400V DC chargers.

How big is it? What are the dimensions (length, width, height)?

GMC Hummer EV Pickup 3X Standard Range (2023-...) comes in the following dimensions:

- Length: 216.8 in
- Width: 93.7 in (including side mirrors) or 86.7 in (excluding side mirrors)
- Height: 79.1 in
- Wheelbase: 135.6 in (distance between the center of the front and rear wheels)
- Curb weight: 8763 lbs (weight of the empty car, no people or cargo)

How much cargo space does it offer? Does it have a front trunk?

Behind the rear seats of the GMC Hummer EV Pickup 3X Standard Range (2023-...), you'll find 36.7 cubic feet of storage space ([Nº15 out of 157 ranked positions](#), among 820 electric vehicles, with some cars sharing positions).

Folding down the rear seats expands the total cargo capacity to cubic feet ([Nº out of ranked positions](#), among 820 electric vehicles, with some cars sharing positions).

Frunk capacity: The front trunk is called a "frunk", and it offers an additional 11.3 cubic feet for storing small items.

Is it suitable for towing? What is the maximum towing capacity?

The GMC Hummer EV Pickup 3X Standard Range (2023-...) can safely tow up to 8500 lbs, provided that the trailer has its own braking system.

When equipped with the Extreme Off-Road Package, the car offers a maximum towing capacity of 7,500 lbs (3,402 kg).
