## About Honda Prologue AWD (2024-...)

GREEN CARS

The Honda Prologue AWD (2024-...) is an all-electric all-wheel drive SUV. It came out in 2024.

The Honda Prologue AWD (2024-...) has a 85 kWh battery pack, allowing it to travel up to 429 km on a single charge. The car has an average efficiency of 19.3 kWh per 100 km (or 5.17 km per kWh) — ranked №300 out of 820 electric vehicles.

#### How powerful is it? How fast does it accelerate?

The Honda Prologue AWD (2024-...) is equipped with a powertrain that delivers up to 214 kW (287 hp) of power and 333 lb-ft of torque.

This enables a 0 to 60 mph acceleration in 6.1 seconds (Nº44 out of 116 ranked positions, among 820 electric vehicles, with some cars sharing positions) and a top speed of 115 mph.

## How far can it go on single charge? What is the real-world range?

The estimated real-world range for Honda Prologue AWD (2024-...) is 267 miles, ranking it Nº101 out of 249 ranked positions. Several conditions can influence this range:

- Speed: The battery drains faster at higher speeds.
- Temperature: Extreme temperatures can impact range.
- Terrain: Range is reduced on hilly or mountainous terrain.
- Driving style: Aggressive driving behaviors, such as frequent acceleration and braking, decrease efficiency.
- Feature utilization: Climate control and media system usage also affect range.

These figures are approximations, and your actual driving range may vary. When planning trips, consider these factors and be prepared for potential charging stops.

For trip planning assistance, utilize the EV Navigation interactive map.

# What charging options are available? How long does it take to charge it?

The Honda Prologue AWD (2024-...) in the USA is equipped with a CCS Type 1 charging port. You can charge it conveniently at home using a standard outlet, or utilize any public AC charging station with the appropriate cable. However, the car's built-in charger (inverter) limits the maximum AC charging speed to 11.5 kW, which translates to roughly 33 miles of range added per hour.

For faster charging, use DC fast-charging stations. The Honda Prologue AWD (2024-...) supports a maximum DC charging rate of 155 kW, but it's important to note that battery temperature and current charge level can affect the actual charging speed you'll experience.

To estimate charging time, rate, and cost, you can use EV Charging Calculator.

## How big is it? What are the dimensions (length, width, height)?

Honda Prologue AWD (2024-...) comes in the following dimensions:

- Length: 192 in
- Width: 78.3 in (including side mirrors) or in (excluding side mirrors)
- Height: 65.2 in
- Wheelbase: 121.8 in (distance between the center of the front and rear wheels)
- Curb weight: 5207 lbs (weight of the empty car, no people or cargo)

### How much cargo space does it offer? Does it have a front trunk?

Behind the rear seats of the Honda Prologue AWD (2024-...), you'll find 25.2 cubic feet of storage space (Nº43 out of 157 ranked positions, among 820 electric vehicles, with some cars sharing positions).

Folding down the rear seats expands the total cargo capacity to 57.7 cubic feet (Nº65 out of 177 ranked positions, among 820 electric vehicles, with some cars sharing positions).

The car doesn't have a "frunk" (front trunk).

## Is it suitable for towing? What is the maximum towing capacity?

The Honda Prologue AWD (2024-...) can safely tow up to 1500 lbs, provided that the trailer has its own braking system.
