About Porsche Macan RWD Electric (2024-...)

The Porsche Macan RWD Electric (2024-...) is an all-electric rear-wheel drive SUV. It came out in 2024. Brand new, the car starts around €80,700.

The Porsche Macan RWD Electric (2024-...) has a 100 kWh battery pack, allowing it to travel up to 514 km on a single charge. The car has an average efficiency of 18.5 kWh per 100 km (or 5.41 km per kWh) — ranked N°82 out of 820 electric vehicles.

How powerful is it? How fast does it accelerate?

The Porsche Macan RWD Electric (2024-...) achieves a 0 to 60 mph acceleration in 5.4 seconds (placing it at N°37 out of 116 ranked positions, among 820 electric vehicles, with some cars sharing positions) and attains a maximum speed of 137 mph.

Its powertrain provides a power output of up to 250 kW (335 hp) and a torque of 415 lb-ft.

How far can it go on single charge? What is the real-world range?

Porsche Macan RWD Electric (2024-...) achieves a real-world range of 319 miles, placing it at N°51 among 249 ranked positions. However, this range is subject to several influences:

- Speed: Traveling at higher speeds reduces battery life.
- Temperature: Extreme cold or hot weather can affect range.
- Terrain: Hilly or mountainous landscapes decrease range.
- Driving habits: Aggressive driving with frequent acceleration and braking consumes more energy.
- Feature usage: Climate control and media systems also influence range.

It's important to acknowledge that these are estimations, and your actual driving range may differ. Consider these factors when planning your trip and be ready for potential charging stops.

What charging options are available? How long does it take to charge it?

The Porsche Macan RWD Electric (2024-...) in the USA comes with a CCS Type 1 charging port. It can be charged at home using a standard domestic socket or at any public AC charging station with the compatible cable. It's important to note that the car's on-board charger (inverter) limits the maximum AC charging rate to 9.6 kW, resulting in approximately 29 miles of range added per hour of charging.

For significantly faster charging, public DC fast-charging stations are available. Although the car can achieve a maximum DC charging rate of 270 kW, factors such as battery temperature and charge level may affect the actual charging speed.
