## What's New for 2025?

For 2025, the Proace Verso Electric carries forward its fresh look and tech from its recent major update. This means you get Toyota's striking new "hammerhead" front-end design, giving it a more modern and assertive stance on the road. Inside, the cabin benefits from an upgraded digital instrument cluster and a larger, more responsive central infotainment touchscreen, typically 10 inches, keeping it competitive. These enhancements significantly boost its appeal, making the daily drive or long trips more enjoyable and connected for everyone on board.

## Design & Exterior

The Proace Verso L1 75 kWh sports a purposeful, van-derived design that's both smart and functional. The updated front grille and sleek headlight units give it a contemporary edge. As the L1 variant, it measures a handy 4981 mm in length, 1924 mm in width (excluding mirrors), and stands 1910 mm tall, making it manageable in city streets yet spacious inside. Its boxy shape is all about maximising interior volume, while practical sliding side doors offer easy access. It's a no-nonsense hauler that looks right at home on European roads.

## Interior, Tech & Cargo

Step inside, and the Proace Verso L1 offers a cabin built for durability and flexibility, with seating configurable for 5, 7, 8, or even 9 occupants! While material quality is geared towards robustness, comfort isn't forgotten. For your luggage, there's a decent 550 litres of boot space with all seats up, expanding to a massive 3200 litres when you fold them down. Sadly, there's no frunk. Tech-wise, expect a user-friendly infotainment system with smartphone connectivity like Apple CarPlay and Android Auto, making every journey connected and convenient.

## Performance & Driving Experience

Under the skin, the Proace Verso L1 75 kWh features a single Permanent Magnet Synchronous Motor (PMSM) driving the front wheels. It delivers a respectable 100 kW of power and 260 Nm of torque, getting this people-carrier from 0 to 100 km/h in a relaxed 11.9 seconds, with a top speed of 130 km/h. The driving experience is smooth and whisper-quiet, typical of an EV, making for serene progress. It's surprisingly nimble for its size, and regenerative braking helps claw back some energy to boost efficiency.

## Range, Battery & Charging

This Proace Verso L1 is kitted out with a 68 kWh usable battery pack (75 kWh nominal). Green Cars

Compare calculates its real-world range at around 300 km, which is pretty decent for daily duties, with an efficiency of 4.41 km/kWh. For charging, it accepts up to 11 kW AC via its CCS Type 2 port, meaning a full top-up takes roughly 6-7 hours. Need a quicker boost? It can handle DC fast charging at up to 100 kW, juicing the battery from 10-80% in about 35-40 minutes.

## Safety & Driver-Assistance Features

While a specific Euro NCAP rating for the 2025 Proace Verso Electric L1 isn't listed, the underlying platform has previously performed well, and Toyota typically equips its vehicles generously. You can expect a suite of modern driver-assistance systems, likely including autonomous emergency braking, lane keeping assist, traffic sign recognition, and adaptive cruise control, often bundled under the Toyota Safety Sense banner. These features work together to keep you and your passengers secure, whether navigating busy city streets or cruising on the motorway.

## Warranty & Maintenance Coverage

Toyota backs the Proace Verso Electric with a comprehensive warranty package in Europe. This typically includes a 3-year/100,000 km general vehicle warranty, which can often be extended up to 10 years or 200,000 km through the Toyota Relax program if serviced annually at an authorized dealer. Crucially for an EV, the high-voltage battery is usually covered for 8 years or 160,000 km, guaranteeing at least 70% of its original capacity. Electric powertrain components also benefit from solid coverage, and maintenance is generally simpler and potentially cheaper than its combustion counterparts.

## How powerful is it? How fast does it accelerate?

The Toyota Proace Verso Electric L1 75 kWh (2024-...) is equipped with a powertrain that delivers up to 100 kW (134 hp) of power and 192 lb-ft of torque.
