About Acura ZDX Type S AWD (2024-...)

Overview

The 2025 Acura ZDX Type S AWD storms onto the scene as Acura's first all-electric SUV, blending performance with premium features. This high-output Type S variant is a real head-turner, aiming to give established electric performance SUVs a run for their money. It boasts a dual-motor setup for some serious all-wheel-drive grunt. While primarily launched in North America, its specs are compelling for a global audience. European pricing and official availability are yet to be confirmed, but expect it to be positioned as a premium offering.

What's New for 2025?

Following its debut for the 2024 model year, the 2025 Acura ZDX Type S AWD is largely a carryover, still fresh from its recent launch. This means buyers get the latest design and tech Acura has poured into its flagship EV. No major mechanical or cosmetic surgery for this model year, allowing the Type S to continue establishing its presence. Focus remains on its potent performance, Google-powered infotainment, and striking design as it rolls into its second year of production with minimal changes.

Design & Exterior

The ZDX Type S AWD flaunts a sleek, athletic stance with Acura's signature Diamond Pentagon grille, now fully enclosed and illuminated for EV duties. It's a looker, with sharp lines and an aggressive presence, especially in Type S trim which gets unique styling cues and larger alloy wheels. Measuring 5022 mm in length, 1955 mm in width (excluding mirrors), and 1637 mm in height, it's a substantial machine. Expect striking LED lighting all-around, enhancing its futuristic yet sporty appeal on the road.

Interior, Tech & Cargo

Inside, the ZDX Type S AWD offers a driver-focused cockpit with premium materials and a sporty ambiance. Expect high-quality leather and sophisticated finishes. Passenger space is generous for five occupants. It's a proper tech-fest with an 11-inch digital instrument cluster and an 11.3-inch infotainment touchscreen powered by Google built-in, including Google Maps and Assistant, plus wireless Apple CarPlay and Android Auto. Cargo capacity is a practical 840 litres in the trunk, expanding to a massive 1785 litres with the rear seats folded. No frunk is specified for this model.

Performance & Driving Experience

Get ready for some serious shove! The ZDX Type S AWD packs a punch with its dual PMSM motors (one front, one rear) delivering a combined 372 kW (around 500 hp) and a hefty 737 Nm of torque. This translates to a blistering 0-100 km/h sprint in just 4.5 seconds, making it properly quick for an SUV. Its all-wheel-drive system ensures excellent traction, while the Type S benefits from performance-tuned adaptive air suspension and uprated Brembo brakes for a dynamic yet comfortable driving experience. Expect multiple drive modes to tailor the experience.

Range, Battery & Charging

The ZDX Type S AWD is powered by a substantial 102 kWh usable battery pack (106 kWh nominal). Green Cars Compare estimates a real-world range of around 425 km, with an efficiency of approximately 4.17

km/kWh. For charging, it features a 400V architecture. AC charging is handled by a standard 11.5 kW on-board unit. When it comes to DC fast charging, it can accept up to 190 kW. The provided specification lists a CCS Type 1 charge port, common in North America; European models, if offered, would typically feature CCS Type 2.

Safety & Driver-Assistance Features

While Euro NCAP ratings are yet to be announced, the ZDX Type S AWD achieved a 5-star overall rating from the US NHTSA. Acura loads the Type S with its comprehensive AcuraWatch™ suite of safety and driver-assistance systems as standard. This typically includes adaptive cruise control with low-speed follow, lane keeping assist, road departure mitigation, collision mitigation braking, blind-spot information, and rear cross-traffic alert. Hands-free cruise assist is also expected to be available, offering cutting-edge convenience on compatible roads.

Warranty & Maintenance Coverage

While specific European warranty details would be confirmed upon market entry, Acura typically offers competitive coverage in North America. This often includes a basic vehicle warranty of around 4 years/80,000 km and a powertrain warranty for about 6 years/110,000 km. The crucial EV battery warranty is generally around 8 years/160,000 km, covering against significant degradation. Complimentary maintenance for the first year or two is also a common perk. Acura, as Honda's premium brand, generally enjoys a reputation for good reliability.

How powerful is it? How fast does it accelerate?

The Acura ZDX Type S AWD (2024-...) can accelerate from 0 to 60 mph in 4.3 seconds (**Nº27 out of 119 ranked positions**, among 968 electric vehicles, with some cars sharing positions) and reach a top speed of 131 mph.

The car's powertrain delivers up to 372 kW (499 hp) of power and 544 lb-ft of torque.

How far can it go on single charge? What is the real-world range?

Real-world range of the Acura ZDX Type S AWD (2024-...) is 264 miles (**Nº112 out of 264 ranked positions**, among 968 electric vehicles, with some cars sharing positions) — depending on several factors, including:

- Speed: Higher speeds deplete the battery faster.
- Temperature: Extreme cold and hot weather impacts range.
- Terrain: Hilly or mountainous terrain reduces range.
- Driving style: Aggressive driving with frequent acceleration and braking consumes more energy.
- Use of features: Features like climate control and media system also affect range.

It's important to remember that these are just estimates, and your actual range may vary. It's always best to factor in these various factors when planning your trip and be prepared for potential charging stops.

Plan your trips using the [EV Navigation interactive map](#).

What charging options are available? How long does it take to charge it?

In the USA Acura ZDX Type S AWD (2024-...) has a CCS Type 1 charge port.

- You can charge it at home using a standard domestic socket or plug into any public AC charging station using the right cable. Keep in mind that the car's on-board charger (inverter) limits the maximum AC charging rate to 11.5 kW, which translates to approximately 27 miles of range added per hour of charging.
- For quicker charging, consider using a compatible DC fast-charging station. The car boasts a maximum charging rate of 190 kW, but remember that battery temperature and charge level can influence the actual speed you'll experience.

Estimate charging time, rate and cost using [EV Charging Calculator](#).

How big is it? What are the dimensions (length, width, height)?

Here are the dimensions and weight for the Acura ZDX Type S AWD (2024-...):

- Length: 197.7 in
- Width: in (including side mirrors) or 77 in (excluding side mirrors)
- Height: 64.4 in
- Wheelbase: 121.8 in (distance between the center of the front and rear wheels)
- Curb weight: 6052 lbs (weight of the empty car, no people or cargo)

How much cargo space does it offer? Does it have a front trunk?

Here's a breakdown of the Acura ZDX Type S AWD (2024-...) cargo space:

- Trunk capacity: With the rear seats up, you get 29.7 cubic feet of cargo space in the back ([Nº27 out of 165 ranked positions](#), among 968 electric vehicles, with some cars sharing positions).
- Max cargo capacity: Fold down the rear seats, and you open up 63 cubic feet of total cargo space ([Nº55 out of 200 ranked positions](#), among 968 electric vehicles, with some cars sharing positions).
- Frunk capacity: The car doesn't have a "frunk" (front trunk).

Is it suitable for towing? What is the maximum towing capacity?

The Acura ZDX Type S AWD (2024-...) has a towing capacity (braked) of up to 3500 lbs (maximum weight the car can tow safely with a trailer that has its own brakes).
