About DS 8 AWD Long Range (2025-...)

Overview

The 2025 DS 8 AWD Long Range is a brand-new, premium electric SUV from the French luxury marque, poised to shake up the segment. This flagship model, especially in its potent AWD Long Range guise, combines striking Parisian design with impressive electric performance and a substantial real-world range. With an estimated new price of €75,000 in Europe, it targets discerning buyers seeking a unique blend of style, technology, and long-distance capability. It's DS Automobiles' ambitious statement in the expanding e-SUV market, promising a truly avant-garde driving experience.

What's New for 2025?

As an entirely new nameplate launching in 2025, the DS 8 AWD Long Range is fresh from the ground up! It spearheads DS Automobiles' next generation of electric vehicles, likely built on an advanced new platform like Stellantis' STLA Medium. This means cutting-edge battery technology, sophisticated digital interfaces, and a suite of the latest driver assistance systems. Expect a significant step up in terms of interior luxury, refinement, and overall tech integration compared to previous DS models, making its debut a highly anticipated event for the brand in the premium EV market.

Design & Exterior

The DS 8 AWD Long Range flaunts a bold, avant-garde design that's unmistakably DS, manufactured in Italy. Expect intricate 'DS Light Veil' daytime running lights, a commanding grille, and sculpted surfaces that exude French haute couture. This specific trim will likely feature unique alloy wheel designs and subtle AWD badging. Dimensionally, it's a substantial machine, measuring 4834 mm in length, 1920 mm in width (excluding mirrors), and 1574 mm in height, giving it serious road presence. It's designed to turn heads and stand out from the SUV crowd.

Interior, Tech & Cargo

Step inside the DS 8 AWD Long Range, and you're greeted by a cabin dripping with Parisian chic and high-quality materials like Nappa leather and Alcantara. Passenger space is generous for its five occupants. For your luggage, there's a capacious 620-litre boot; while max capacity with seats folded isn't specified, expect it to be very accommodating for an SUV of this size. A frunk is not mentioned. Tech-wise, anticipate a large central touchscreen with the DS IRIS System, a configurable digital driver's display, and seamless smartphone integration for a truly connected journey.

Performance & Driving Experience

This AWD Long Range trim isn't just about looks; it packs a serious punch! With dual Permanent Magnet Synchronous Motors (PMSM), one at the front and one at the rear, delivering a combined 276 kW and a hefty 511 Nm of torque, it rockets from 0-100 km/h in a swift 5.4 seconds. The all-wheel-drive system ensures confident traction in all conditions. Expect a sophisticated ride, blending comfort with dynamic handling, capable of reaching a top speed of 190 km/h. Multiple regenerative braking modes will allow for efficient energy recovery.

Range, Battery & Charging

The DS 8 AWD Long Range is built for big adventures, boasting a 97.2 kWh usable battery (101 kWh nominal). This gives a Green Cars Compare calculated real-world range estimate of around 583 km, with an efficiency of 6 km/kWh – impressive! Charging is via a CCS Type 2 port. Its 400V architecture supports AC charging via a standard 11 kW unit (full in ~9 hours), or an optional 22 kW unit (~4.5 hours). DC fast charging is a highlight, maxing out at a potent 200 kW, allowing for rapid top-ups on longer journeys.

Safety & Driver-Assistance Features

While official Euro NCAP ratings are pending for this new 2025 model, expect the DS 8 AWD Long Range to aim for a top five-star score, packed with advanced safety tech. Standard features will likely include a comprehensive suite such as DS DRIVE ASSIST with adaptive cruise control and lane keeping, blind-spot monitoring, emergency braking, and traffic sign recognition. Higher-spec options might add features like night vision or an enhanced semi-autonomous driving package, ensuring peace of mind on every journey. It also features a towing capacity of 1600 kg (braked).

Warranty & Maintenance Coverage

Owners of the new DS 8 AWD Long Range can anticipate warranty coverage typical of premium European brands. This usually includes a basic vehicle warranty for 2 or 3 years with unlimited kilometres, or a set kilometre cap. Critically, the high-voltage battery pack will be covered for an extended period, commonly 8 years or 160,000 km, guaranteeing at least 70% of its original capacity. Powertrain components often mirror the battery warranty. Details on complimentary maintenance plans would be confirmed by local DS dealers, but expect solid support for this flagship EV.

How powerful is it? How fast does it accelerate?

The DS 8 AWD Long Range (2025-...) achieves a 0 to 60 mph acceleration in 5.2 seconds (placing it at Nº36 out of 120 ranked positions, among 1014 electric vehicles, with some cars sharing positions) and attains a maximum speed of 118 mph.

Its powertrain provides a power output of up to 276 kW (370 hp) and a torque of 377 lb-ft.

How far can it go on single charge? What is the real-world range?

DS 8 AWD Long Range (2025-...) achieves a real-world range of 362 miles, placing it at №34 among 272 ranked positions. However, this range is subject to several influences:

- Speed: Traveling at higher speeds reduces battery life.
- Temperature: Extreme cold or hot weather can affect range.
- Terrain: Hilly or mountainous landscapes decrease range.
- Driving habits: Aggressive driving with frequent acceleration and braking consumes more energy.
- Feature usage: Climate control and media systems also influence range.

It's important to acknowledge that these are estimations, and your actual driving range may differ. Consider these factors when planning your trip and be ready for potential charging stops.

Utilize the interactive EV Navigation map for trip planning assistance.

What charging options are available? How long does it take to

charge it?

The DS 8 AWD Long Range (2025-...) in the USA comes with a CCS Type 2 charging port. It can be charged at home using a standard domestic socket or at any public AC charging station with the compatible cable. It's important to note that the car's on-board charger (inverter) limits the maximum AC charging rate to 11 kW, resulting in approximately 37 miles of range added per hour of charging.

For significantly faster charging, public DC fast-charging stations are available. Although the car can achieve a maximum DC charging rate of 200 kW, factors such as battery temperature and charge level may affect the actual charging speed.

Use EV Charging Calculator to estimate charging time, rate, and cost.

How big is it? What are the dimensions (length, width, height)?

The size and weight specifications for DS 8 AWD Long Range (2025-...) are as follows:

Length: 190.3 in

• Width: 82.6 in (including side mirrors) or 75.6 in (excluding side mirrors)

• Height: 62 in

• Wheelbase: 114.4 in (distance between the center of the front and rear wheels)

Curb weight: 5046 lbs (weight of the empty car, no people or cargo)

How much cargo space does it offer? Does it have a front trunk?

The rear cargo area of the DS 8 AWD Long Range (2025-...) provides 21.9 cubic feet of space when the rear seats are upright (Nº55 out of 170 ranked positions, among 1014 electric vehicles, with some cars sharing positions).

Folding these seats down unlocks a maximum cargo capacity of cubic feet (Nº out of ranked positions, among 1014 electric vehicles, with some cars sharing positions).

The car doesn't have a "frunk" (front trunk).

Is it suitable for towing? What is the maximum towing capacity?

The DS 8 AWD Long Range (2025-...) is officially rated to tow 3527 lbs. This applies to trailers equipped with brakes.
