The Porsche Taycan Turbo GT Weissach Package (2024-...) has a 105 kWh battery pack, allowing it to travel up to 297 mi on a single charge — ranked **Nº158** out of 736 electric vehicles.

How powerful is it? How fast does it accelerate?

The Porsche Taycan Turbo GT Weissach Package (2024-...) achieves a 0 to 60 mph acceleration in 2.1 seconds (placing it at **Nº4** out of 117 ranked positions, among 736 electric vehicles, with some cars sharing positions) and attains a maximum speed of 190 mph.

Its powertrain provides a power output of up to 760 kW (1019 hp) and a torque of 988 lb-ft.

How far can it go on single charge? What is the real-world range?

Porsche Taycan Turbo GT Weissach Package (2024-...) achieves a real-world range of 297 miles, placing it at **Nº64** among 239 ranked positions. However, this range is subject to several influences:

- Speed: Traveling at higher speeds reduces battery life.
- Temperature: Extreme cold or hot weather can affect range.
- Terrain: Hilly or mountainous landscapes decrease range.
- Driving habits: Aggressive driving with frequent acceleration and braking consumes more energy.
- Feature usage: Climate control and media systems also influence range.

It's important to acknowledge that these are estimations, and your actual driving range may differ. Consider these factors when planning your trip and be ready for potential charging stops.

What charging options are available? How long does it take to charge it?

The Porsche Taycan Turbo GT Weissach Package (2024-...) in the USA comes with a CCS Type 1 charging port. It can be charged at home using a standard domestic socket or at any public AC charging station with the compatible cable. It's important to note that the car's on-board charger (inverter) limits the maximum AC charging rate to 9.6 kW, resulting in approximately 26 miles of range added per hour of charging.

For significantly faster charging, public DC fast-charging stations are available. Although the car can

achieve a maximum DC charging rate of 320 kW, factors such as battery temperature and charge level may affect the actual charging speed.

In the United States, the Porsche Taycan comes standard with a 9.6 kW on-board charger. For drivers who desire faster AC charging, an optional 19.2 kW charger is available. Please note that due to its 800V architecture, the Porsche Taycan's charging speed is limited to 50kW at 400V DC chargers. However, an optional upgrade is available to increase the charging speed at 400V stations to 150kW.
