### How far can it go on single charge? What is the real-world range?

Real-world range of the Chevrolet Blazer EV Performance AWD is 261–319 miles (ranked N°167 out of 667 electric vehicles) — depending on several factors, including:

- Speed: Higher speeds deplete the battery faster.
- Temperature: Extreme cold and hot weather impacts range.
- Terrain: Hilly or mountainous terrain reduces range.
- Driving style: Aggressive driving with frequent acceleration and braking consumes more energy.
- Use of features: Features like climate control and media system also affect range.
