## About Lucid Air Sapphire (2023-...)

The Lucid Air Sapphire (2023-...) is an all-electric all-wheel drive sedan. It came out in 2023 replacing the older Lucid Air Grand Touring Performance (2022-2024). Brand new, the car starts around \$249,000.

The Lucid Air Sapphire (2023-...) has a 120 kWh battery pack, allowing it to travel up to 388 mi on a single charge — ranked №16 out of 820 electric vehicles.

### How powerful is it? How fast does it accelerate?

The Lucid Air Sapphire (2023-...) achieves a 0 to 60 mph acceleration in 1.9 seconds (placing it at [№2 out of 116 ranked positions](#), among 820 electric vehicles, with some cars sharing positions) and attains a maximum speed of 205 mph.

Its powertrain provides a power output of up to 908 kW (1218 hp) and a torque of 1431 lb-ft.

### How far can it go on single charge? What is the real-world range?

Lucid Air Sapphire (2023-...) achieves a real-world range of 388 miles, placing it at [№15 among 249 ranked positions](#). However, this range is subject to several influences:

- Speed: Traveling at higher speeds reduces battery life.
- Temperature: Extreme cold or hot weather can affect range.
- Terrain: Hilly or mountainous landscapes decrease range.
- Driving habits: Aggressive driving with frequent acceleration and braking consumes more energy.
- Feature usage: Climate control and media systems also influence range.

It's important to acknowledge that these are estimations, and your actual driving range may differ. Consider these factors when planning your trip and be ready for potential charging stops.

### What charging options are available? How long does it take to charge it?

The Lucid Air Sapphire (2023-...) in the USA comes with a CCS Type 1 charging port. It can be charged at home using a standard domestic socket or at any public AC charging station with the compatible cable. It's important to note that the car's on-board charger (inverter) limits the maximum AC charging rate to 19.2 kW, resulting in approximately 57 miles of range added per hour of charging.

For significantly faster charging, public DC fast-charging stations are available. Although the car can achieve a maximum DC charging rate of 300 kW, factors such as battery temperature and charge level may affect the actual charging speed.

## How big is it? What are the dimensions (length, width, height)?

The size and weight specifications for Lucid Air Sapphire (2023-...) are as follows:

- Length: 197 in
- Width: 86.4 in (including side mirrors) or 78.3 in (excluding side mirrors)
- Height: 55.4 in
- Wheelbase: 116.5 in (distance between the center of the front and rear wheels)
- Curb weight: 5336 lbs (weight of the empty car, no people or cargo)
