How powerful is it? How fast does it accelerate?

The Volkswagen ID.Buzz Long Pro S 4MOTION (2024-...) achieves a 0 to 60 mph acceleration in 6 seconds (placing it at №43 out of 116 ranked positions, among 816 electric vehicles, with some cars sharing positions) and attains a maximum speed of 99 mph.

Its powertrain provides a power output of up to 250 kW (335 hp) and a torque of 501 lb-ft.

How far can it go on single charge? What is the real-world range?

Volkswagen ID.Buzz Long Pro S 4MOTION (2024-...) achieves a real-world range of 219 miles, placing it at №147 among 249 ranked positions. However, this range is subject to several influences:

- Speed: Traveling at higher speeds reduces battery life.
- Temperature: Extreme cold or hot weather can affect range.
- Terrain: Hilly or mountainous landscapes decrease range.
- Driving habits: Aggressive driving with frequent acceleration and braking consumes more energy.
- Feature usage: Climate control and media systems also influence range.

It's important to acknowledge that these are estimations, and your actual driving range may differ. Consider these factors when planning your trip and be ready for potential charging stops.

For significantly faster charging, public DC fast-charging stations are available. Although the car can

achieve a maximum DC charging rate of 200 kW, factors such as battery temperature and charge level may affect the actual charging speed.
