About MG MG5 Electric Standard Range (2020-2021)

The MG MG5 Electric Standard Range (2020-2021) is an all-electric front-wheel drive wagon. It came out in 2020. MG stopped making the Standard Range in 2021 and replaced it with the MG MG5 Electric Standard Range (2022-...). The car is not available on the US market.

The MG MG5 Electric Standard Range (2020-2021) has a 52.5 kWh battery pack, allowing it to travel up to 181 mi on a single charge — ranked №644 out of 816 electric vehicles.

The MG5 Electric was originally marketed as the MG5 EV until the 2022 model year.

How powerful is it? How fast does it accelerate?

The MG MG5 Electric Standard Range (2020-2021) can accelerate from 0 to 60 mph in 7.4 seconds (№57 out of 116 ranked positions, among 816 electric vehicles, with some cars sharing positions) and reach a top speed of 115 mph.

The car's powertrain delivers up to 115 kW (154 hp) of power and 192 lb-ft of torque.

How far can it go on single charge? What is the real-world range?

Real-world range of the MG MG5 Electric Standard Range (2020-2021) is 181 miles (№180 out of 249 ranked positions, among 816 electric vehicles, with some cars sharing positions) — depending on several factors, including:

- Speed: Higher speeds deplete the battery faster.
- Temperature: Extreme cold and hot weather impacts range.
- Terrain: Hilly or mountainous terrain reduces range.
- Driving style: Aggressive driving with frequent acceleration and braking consumes more energy.
- Use of features: Features like climate control and media system also affect range.

It's important to remember that these are just estimates, and your actual range may vary. It's always best to factor in these various factors when planning your trip and be prepared for potential charging stops.
