General Info

Years of Production	2020 - 2021
Available in the USA	Yes
Country of Manufacture	No data
Current Status	Discontinued
Body Style	Hatchback
Price USA (New/Used)	\$No data/19500

Range and Efficiency

Range EPA	110 mi
Range WLTP	145 mi
Range GCC	114 mi
Battery (Usable/Nominal)	28.9/32.6 kWh
Efficiency (Energy/Range)	25.4 kWh/100 mi
Efficiency (Range/Energy)	3.94 mi/kWh

Charging

Architecture	400 V
Max AC Charging	7.4 kW
Max DC Charging	49 kW
Charge Port	CCS Type 1

Performance

Drive Type	FWD 1 motor: PMSM
Motor (Power/Torque)	135 kW (181 hp)/199 lb-ft
Acceleration 0-60 mph	7 s
Top Speed	93 mph

Dimensions

Length	151.4 in
Width (with Mirrors/no Mirrors)	77.4/68 in
Height	56.4 in
Wheelbase	98.2 in

Cargo and Towing

Number of Seats	4
Curb Weight	3153 lb
Cargo Volume (Trunk/Max/Frunk)	7.5/25.8/No data ft ³
Towing Capacity	No data

About Mini Cooper SE (2020-2021)

The Mini Cooper SE (2020-2021) is an all-electric front-wheel drive hatchback. It came out in 2020. Mini stopped making the SE in 2021 and replaced it with the Mini Cooper SE (2021-2024). You can still find Mini Cooper SE (2020-2021) on the used car market, with prices starting around \$19,500.

The Mini Cooper SE (2020-2021) has a 32.6 kWh battery pack, allowing it to travel up to 114 mi on a single charge — ranked №777 out of 820 electric vehicles.

How powerful is it? How fast does it accelerate?

The Mini Cooper SE (2020-2021) achieves a 0 to 60 mph acceleration in 7 seconds (placing it at №53 out of 116 ranked positions, among 820 electric vehicles, with some cars sharing positions) and attains a maximum speed of 93 mph.

Its powertrain provides a power output of up to 135 kW (181 hp) and a torque of 199 lb-ft.

How far can it go on single charge? What is the real-world range?

Mini Cooper SE (2020-2021) achieves a real-world range of 114 miles, placing it at №220 among 249 ranked positions. However, this range is subject to several influences:

- Speed: Traveling at higher speeds reduces battery life.
- Temperature: Extreme cold or hot weather can affect range.
- Terrain: Hilly or mountainous landscapes decrease range.
- Driving habits: Aggressive driving with frequent acceleration and braking consumes more energy.
- Feature usage: Climate control and media systems also influence range.

It's important to acknowledge that these are estimations, and your actual driving range may differ. Consider these factors when planning your trip and be ready for potential charging stops.

Utilize the [interactive EV Navigation map](#) for trip planning assistance.

What charging options are available? How long does it take to charge it?

The Mini Cooper SE (2020-2021) in the USA comes with a CCS Type 1 charging port. It can be charged at home using a standard domestic socket or at any public AC charging station with the compatible cable. It's important to note that the car's on-board charger (inverter) limits the maximum AC charging rate to 7.4 kW, resulting in approximately 26 miles of range added per hour of charging.

For significantly faster charging, public DC fast-charging stations are available. Although the car can achieve a maximum DC charging rate of 49 kW, factors such as battery temperature and charge level may affect the actual charging speed.

Use [EV Charging Calculator](#) to estimate charging time, rate, and cost.

How big is it? What are the dimensions (length, width, height)?

The size and weight specifications for Mini Cooper SE (2020-2021) are as follows:

- Length: 151.4 in
- Width: 77.4 in (including side mirrors) or 68 in (excluding side mirrors)
- Height: 56.4 in
- Wheelbase: 98.2 in (distance between the center of the front and rear wheels)
- Curb weight: 3153 lbs (weight of the empty car, no people or cargo)

How much cargo space does it offer? Does it have a front trunk?

The rear cargo area of the Mini Cooper SE (2020-2021) provides 7.5 cubic feet of space when the rear seats are upright ([Nº145 out of 157 ranked positions](#), among 820 electric vehicles, with some cars sharing positions).

Folding these seats down unlocks a maximum cargo capacity of 25.8 cubic feet ([Nº170 out of 177 ranked positions](#), among 820 electric vehicles, with some cars sharing positions).

The car doesn't have a "frunk" (front trunk).

Is it suitable for towing? What is the maximum towing capacity?

The car isn't officially rated for towing.
