About Škoda Elroq 60 (2024-...)

The Škoda Elroq 60 (2024-...) is an all-electric rear-wheel drive SUV. It came out in 2024. The car is not available on the US market.

The Škoda Elroq 60 (2024-...) has a 63 kWh battery pack, allowing it to travel up to 237 mi on a single charge — ranked №425 out of 820 electric vehicles.

How powerful is it? How fast does it accelerate?

The Škoda Elroq 60 (2024-...) is equipped with a powertrain that delivers up to 150 kW (201 hp) of power and 229 lb-ft of torque.

This enables a 0 to 60 mph acceleration in 8.2 seconds (№65 out of 116 ranked positions, among 820 electric vehicles, with some cars sharing positions) and a top speed of 99 mph.

How far can it go on single charge? What is the real-world range?

The estimated real-world range for Škoda Elroq 60 (2024-...) is 237 miles, ranking it №130 out of 249 ranked positions. Several conditions can influence this range:

- Speed: The battery drains faster at higher speeds.
- Temperature: Extreme temperatures can impact range.
- Terrain: Range is reduced on hilly or mountainous terrain.
- Driving style: Aggressive driving behaviors, such as frequent acceleration and braking, decrease efficiency.
- Feature utilization: Climate control and media system usage also affect range.

These figures are approximations, and your actual driving range may vary. When planning trips, consider these factors and be prepared for potential charging stops.

You can charge it conveniently at home using a standard outlet, or utilize any public AC charging station with the appropriate cable. However, the car's built-in charger (inverter) limits the maximum AC charging speed to 11 kW, which translates to roughly 40 miles of range added per hour.

For faster charging, use DC fast-charging stations. The Škoda Elroq 60 (2024-...) supports a maximum DC charging rate of 165 kW, but it's important to note that battery temperature and current charge level can affect the actual charging speed you'll experience.

To estimate charging time, rate, and cost, you can use [EV Charging Calculator](#).
