About Porsche Taycan 4 Plus (2024-...)

The Porsche Taycan 4 Plus (2024-...) is an all-electric all-wheel drive sedan. It came out in 2024. Brand new, the car starts around \$109,080.

The Porsche Taycan 4 Plus (2024-...) has a 105 kWh battery pack, allowing it to travel up to 325 mi on a single charge — ranked №73 out of 820 electric vehicles.

How powerful is it? How fast does it accelerate?

The Porsche Taycan 4 Plus (2024-...) achieves a 0 to 60 mph acceleration in 4.4 seconds (placing it at №27 out of 116 ranked positions, among 820 electric vehicles, with some cars sharing positions) and attains a maximum speed of 137 mph.

Its powertrain provides a power output of up to 320 kW (429 hp) and a torque of 450 lb-ft.

How far can it go on single charge? What is the real-world range?

Porsche Taycan 4 Plus (2024-...) achieves a real-world range of 325 miles, placing it at №45 among 249 ranked positions. However, this range is subject to several influences:

- Speed: Traveling at higher speeds reduces battery life.
- Temperature: Extreme cold or hot weather can affect range.
- Terrain: Hilly or mountainous landscapes decrease range.
- Driving habits: Aggressive driving with frequent acceleration and braking consumes more energy.
- Feature usage: Climate control and media systems also influence range.

It's important to acknowledge that these are estimations, and your actual driving range may differ. Consider these factors when planning your trip and be ready for potential charging stops.

What charging options are available? How long does it take to charge it?

The Porsche Taycan 4 Plus (2024-...) in the USA comes with a CCS Type 1 charging port. It can be charged at home using a standard domestic socket or at any public AC charging station with the compatible cable. It's important to note that the car's on-board charger (inverter) limits the maximum AC charging rate to 9.6 kW, resulting in approximately 29 miles of range added per hour of charging.

For significantly faster charging, public DC fast-charging stations are available. Although the car can achieve a maximum DC charging rate of 320 kW, factors such as battery temperature and charge level may affect the actual charging speed.

Use [EV Charging Calculator](#) to estimate charging time, rate, and cost.

In the United States, the Porsche Taycan comes standard with a 9.6 kW on-board charger. For those seeking quicker AC charging speeds, an optional 19.2 kW charger is available. Please note that due to its 800V architecture, the Porsche Taycan's charging speed is limited to 150kW at 400V DC chargers.

How big is it? What are the dimensions (length, width, height)?

The size and weight specifications for Porsche Taycan 4 Plus (2024-...) are as follows:

- Length: 195.4 in
- Width: 84.4 in (including side mirrors) or 77.4 in (excluding side mirrors)
- Height: 54.3 in
- Wheelbase: 114.2 in (distance between the center of the front and rear wheels)
- Curb weight: 4971 lbs (weight of the empty car, no people or cargo)

How much cargo space does it offer? Does it have a front trunk?

The rear cargo area of the Porsche Taycan 4 Plus (2024-...) provides 14.4 cubic feet of space when the rear seats are upright ([Nº107 out of 157 ranked positions](#), among 820 electric vehicles, with some cars sharing positions).

Folding these seats down unlocks a maximum cargo capacity of cubic feet ([Nº out of ranked positions](#), among 820 electric vehicles, with some cars sharing positions).

In addition, the car has a frunk, a front compartment with 3 cubic feet dedicated to smaller items.

Is it suitable for towing? What is the maximum towing capacity?

The car isn't officially rated for towing.
