How powerful is it? How fast does it accelerate?

The Hyundai Ioniq 9 Long Range AWD (2025-...) achieves a 0 to 60 mph acceleration in 6.4 seconds (placing it at №47 out of 118 ranked positions, among 833 electric vehicles, with some cars sharing positions) and attains a maximum speed of 124 mph.

Its powertrain provides a power output of up to 230 kW (308 hp) and a torque of 443 lb-ft.

How far can it go on single charge? What is the real-world range?

Hyundai Ioniq 9 Long Range AWD (2025-...) achieves a real-world range of 301 miles, placing it at №68 among 253 ranked positions. However, this range is subject to several influences:

- Speed: Traveling at higher speeds reduces battery life.
- Temperature: Extreme cold or hot weather can affect range.
- Terrain: Hilly or mountainous landscapes decrease range.
- Driving habits: Aggressive driving with frequent acceleration and braking consumes more energy.
- Feature usage: Climate control and media systems also influence range.

It's important to acknowledge that these are estimations, and your actual driving range may differ. Consider these factors when planning your trip and be ready for potential charging stops.

What charging options are available? How long does it take to charge it?

The Hyundai Ioniq 9 Long Range AWD (2025-...) in the USA comes with a Tesla (NACS) charging port. It can be charged at home using a standard domestic socket or at any public AC charging station with the compatible cable. It's important to note that the car's on-board charger (inverter) limits the maximum AC charging rate to 11 kW, resulting in approximately 28 miles of range added per hour of charging.

For significantly faster charging, public DC fast-charging stations are available. Although the car can achieve a maximum DC charging rate of 350 kW, factors such as battery temperature and charge level may affect the actual charging speed.
