## General Info

Years of Production	2025 -
Market Availability	EU, USA
Country of Manufacture	Germany
Current Status	Produced
Body Style	SUV
Price USA (New/Used)	\$115000/No data

## Range and Efficiency

Range EPA	303 mi
Range WLTP	324-373 mi
Range GCC	299 mi
Battery (Usable/Nominal)	108.9/115 kWh
Efficiency (Energy/Range)	36.4 kWh/100 mi
Efficiency (Range/Energy)	2.75 mi/kWh

## Charging

Architecture	400 V
Max AC Charging	11 kW
Max DC Charging	195 kW
Charge Port	CCS Type 1

## Performance

Drive Type	AWD 2 motors: PMSM (front), PMSM (rear)
Motor (Power/Torque)	485 kW (650 hp)/749 lb-ft
Acceleration 0-60 mph	3.6 s
Top Speed	155 mph

## Dimensions

Length	195.5 in
Width (with Mirrors/no Mirrors)	87.8/77.6 in
Height	66.7 in
Wheelbase	118.1 in

## Cargo and Towing

Number of Seats	5
Curb Weight	5853 lb
Cargo Volume (Trunk/Max/Frunk)	17.7/61.8/No data ft3
Towing Capacity	No data

## About BMW iX M70 xDrive (2025-...)

The BMW iX M70 xDrive (2025-...) is an all-electric SUV. It came out in 2025 replacing the older BMW iX M60 (2022-2025). Brand new, the car starts around \$115,000. The car is not available on the US market.

The BMW iX M70 xDrive (2025-...) has a 115 kWh battery pack, allowing it to travel up to 299 mi on a single charge — ranked №191 out of 933 electric vehicles.

## How powerful is it? How fast does it accelerate?

The BMW iX M70 xDrive (2025-...) achieves a 0 to 60 mph acceleration in 3.6 seconds (placing it at [№20 out of 118 ranked positions](#), among 933 electric vehicles, with some cars sharing positions) and attains a maximum speed of 155 mph.

Its powertrain provides a power output of up to 485 kW (650 hp) and a torque of 749 lb-ft.

## How far can it go on single charge? What is the real-world range?

BMW iX M70 xDrive (2025-...) achieves a real-world range of 299 miles, placing it at [№75 among 262 ranked positions](#). However, this range is subject to several influences:

- Speed: Traveling at higher speeds reduces battery life.
- Temperature: Extreme cold or hot weather can affect range.
- Terrain: Hilly or mountainous landscapes decrease range.
- Driving habits: Aggressive driving with frequent acceleration and braking consumes more energy.
- Feature usage: Climate control and media systems also influence range.

It's important to acknowledge that these are estimations, and your actual driving range may differ. Consider these factors when planning your trip and be ready for potential charging stops.

Utilize the [interactive EV Navigation map](#) for trip planning assistance.

## What charging options are available? How long does it take to charge it?

The BMW iX M70 xDrive (2025-...) in the USA comes with a CCS Type 1 charging port. It can be charged at home using a standard domestic socket or at any public AC charging station with the compatible cable. It's important to note that the car's on-board charger (inverter) limits the maximum AC charging rate to 11 kW, resulting in approximately 27 miles of range added per hour of charging.

For significantly faster charging, public DC fast-charging stations are available. Although the car can achieve a maximum DC charging rate of 195 kW, factors such as battery temperature and charge level may affect the actual charging speed.

Use [EV Charging Calculator](#) to estimate charging time, rate, and cost.

## How big is it? What are the dimensions (length, width, height)?

The size and weight specifications for BMW iX M70 xDrive (2025-...) are as follows:

- Length: 195.5 in
- Width: 87.8 in (including side mirrors) or 77.6 in (excluding side mirrors)
- Height: 66.7 in
- Wheelbase: 118.1 in (distance between the center of the front and rear wheels)
- Curb weight: 5853 lbs (weight of the empty car, no people or cargo)

## How much cargo space does it offer? Does it have a front trunk?

The rear cargo area of the BMW iX M70 xDrive (2025-...) provides 17.7 cubic feet of space when the rear seats are upright ([Nº81 out of 161 ranked positions](#), among 933 electric vehicles, with some cars sharing positions).

Folding these seats down unlocks a maximum cargo capacity of 61.8 cubic feet ([Nº55 out of 193 ranked positions](#), among 933 electric vehicles, with some cars sharing positions).

The car doesn't have a "frunk" (front trunk).

## Is it suitable for towing? What is the maximum towing capacity?

The car isn't officially rated for towing.
