

# Lucid Air Touring (2025-...) (USA)

- [Car Page ↗](#)
- [Charging ↗](#)
- [FAQs ↗](#)
- [Video Reviews ↗](#)

## General Info

Years of Production	2025 -
Market Availability	USA
Country of Manufacture	USA, Saudi Arabia
Current Status	Produced
Body Style	Sedan
Price USA (New/Used)	\$79900/No data

## Range and Efficiency

Range EPA	431 mi
Range WLTP	No data
Range GCC	409 mi
Battery (Usable/Nominal)	92/94 kWh
Efficiency (Energy/Range)	22.5 kWh/100 mi
Efficiency (Range/Energy)	4.45 mi/kWh

## Charging

Architecture	No data
Max AC Charging	19.2 kW
Max DC Charging	250 kW (50 kW at 400 V)
Charge Port	CCS Type 1

## Performance

Drive Type	AWD PMSM (front), PMSM (rear)
Motor (Power/Torque)	462 kW (620 hp)/885 lb-ft
Acceleration 0-60 mph	3.4 s
Top Speed	140 mph

## Dimensions

Length	195.9 in
Width (with Mirrors/no Mirrors)	86.4/76.2 in
Height	55.4 in
Wheelbase	116.5 in

## Cargo and Towing

Number of Seats	5
Curb Weight	4988 lb
Cargo Volume (Trunk/Max/Frunk)	16.1/22.1/10 ft3
Towing Capacity	No data

# About Lucid Air Touring (2025-...)

## Overview

The 2025 Lucid Air Touring hits the sweet spot in the luxury EV sedan market, brilliantly blending staggering range with potent performance. Now starting at a more competitive \$79,900, this trim makes Lucid's cutting-edge tech more accessible. It serves as the intelligent choice for buyers who crave the core Lucid experience—a stunningly designed, high-tech sanctuary on wheels with grand-touring comfort—without stretching to the budget of the top-tier models. Its combination of efficiency, power, and luxury makes it a formidable rival to established German and American competitors.

## What's New for 2025?

The most significant update for the 2025 Air Touring is a major price repositioning, making it a much more compelling value proposition. While the hardware remains largely unchanged, Lucid continues to roll out substantive over-the-air software updates, which have recently added much-requested features like Apple CarPlay. For 2025, Lucid is also beginning its transition to the NACS (Tesla) charging standard. While early models will ship with a CCS Type 1 port, an adapter will likely be included to ensure seamless access to all DC fast-charging networks across the country.

## Design & Exterior

The Lucid Air Touring is a masterclass in aerodynamic elegance, boasting a sleek, futuristic profile that looks like it's slicing through the air even when parked. Its signature features include the intelligent Micro Lens Array headlights and a full-width rear light bar. The car's long, low, and wide stance is defined by its dimensions: 195.9 inches long, 76.2 inches wide, and a mere 55.4 inches high. The Touring trim maintains a sophisticated aesthetic with beautifully crafted wheels and subtle chrome accents, perfectly embodying its luxury GT character.

## Interior, Tech & Cargo

Inside, the Air Touring offers a stunningly open and airy cabin, especially when equipped with the optional Glass Canopy roof. Material quality is exceptional, featuring sustainably sourced trim and plush leathers. Dominating the dash is the floating 34-inch 5K Glass Cockpit display, complemented by a retractable central Pilot Panel for deeper vehicle controls. Passenger space is generous for a five-seater. Utility is a standout feature, with a 16.1 ft<sup>3</sup> trunk and a class-leading 10 ft<sup>3</sup> frunk, which combine for a massive 22.1 ft<sup>3</sup> of cargo space with the rear seats folded.

## Performance & Driving Experience

Don't let the "Touring" name fool you; this thing is a rocket. Its dual-motor all-wheel-drive system, featuring front and rear Permanent Magnet Synchronous Motors, produces a combined 620 horsepower (462 kW) and a massive 885 lb-ft of torque. That's enough grunt to launch this luxury sedan from 0-60 mph in a blistering 3.4 seconds, all the way to a top speed of 140 mph. It delivers a serene, whisper-quiet ride for highway cruising, yet the adaptive suspension keeps it impressively flat and composed when you hustle it through the corners.

## Range, Battery & Charging

The Air Touring is an efficiency powerhouse. Its 92 kWh usable battery delivers a Green Cars Compare estimated real-world range of 409 miles, achieving an incredible 4.45 mi/kWh. The car's 900V+ electrical architecture is the secret sauce to its rapid charging. At home on a Level 2 charger, the standard 19.2 kW on-board unit is among the fastest available. At a DC fast-charging station, it can pull up to 250 kW via its CCS Type 1 port, capable of adding over 200 miles of range in about 20 minutes under ideal conditions.

## Safety & Driver-Assistance Features

While a specific NHTSA rating is pending, the Lucid Air platform has already earned a top 5-star safety rating from the stringent Euro NCAP. Every Touring comes standard with the comprehensive DreamDrive advanced driver-assistance system. This suite includes essentials like Traffic Jam Assist, adaptive cruise control, lane departure protection, and blind-spot monitoring. For those seeking the most advanced features, the optional DreamDrive Pro system adds LiDAR and additional sensors for enhanced semi-autonomous driving capabilities and future software updates.

## Warranty & Maintenance Coverage

Lucid provides a solid warranty for peace of mind. The Air Touring is covered by a 4-year/50,000-mile basic vehicle warranty. The critical powertrain components and the high-voltage battery are backed for a longer period of 8 years or 100,000 miles. The battery warranty also includes a degradation provision, guaranteeing it will retain at least 70% of its original capacity over the warranty term. Unlike some luxury rivals, Lucid does not include complimentary scheduled maintenance, so routine servicing is a separate cost for owners.

## How powerful is it? How fast does it accelerate?

The Lucid Air Touring (2025-...) can accelerate from 0 to 60 mph in 3.4 seconds ([Nº18 out of 120 ranked positions](#), among 999 electric vehicles, with some cars sharing positions) and reach a top speed of 140 mph.

The car's powertrain delivers up to 462 kW (620 hp) of power and 885 lb-ft of torque.

## How far can it go on single charge? What is the real-world range?

Real-world range of the Lucid Air Touring (2025-...) is 409 miles ([Nº11 out of 268 ranked positions](#), among 999 electric vehicles, with some cars sharing positions) — depending on several factors, including:

- Speed: Higher speeds deplete the battery faster.
- Temperature: Extreme cold and hot weather impacts range.
- Terrain: Hilly or mountainous terrain reduces range.
- Driving style: Aggressive driving with frequent acceleration and braking consumes more energy.
- Use of features: Features like climate control and media system also affect range.

It's important to remember that these are just estimates, and your actual range may vary. It's always best to factor in these various factors when planning your trip and be prepared for potential charging stops.

Plan your trips using the [EV Navigation interactive map](#).

## What charging options are available? How long does it take to

# charge it?

In the USA Lucid Air Touring (2025-...) has a CCS Type 1 charge port.

- You can charge it at home using a standard domestic socket or plug into any public AC charging station using the right cable. Keep in mind that the car's on-board charger (inverter) limits the maximum AC charging rate to 19.2 kW, which translates to approximately 77 miles of range added per hour of charging.
- For quicker charging, consider using a compatible DC fast-charging station. The car boasts a maximum charging rate of 250 kW, but remember that battery temperature and charge level can influence the actual speed you'll experience.

Estimate charging time, rate and cost using [EV Charging Calculator](#).

## How big is it? What are the dimensions (length, width, height)?

Here are the dimensions and weight for the Lucid Air Touring (2025-...):

- Length: 195.9 in
- Width: 86.4 in (including side mirrors) or 76.2 in (excluding side mirrors)
- Height: 55.4 in
- Wheelbase: 116.5 in (distance between the center of the front and rear wheels)
- Curb weight: 4988 lbs (weight of the empty car, no people or cargo)

## How much cargo space does it offer? Does it have a front trunk?

Here's a breakdown of the Lucid Air Touring (2025-...) cargo space:

- Trunk capacity: With the rear seats up, you get 16.1 cubic feet of cargo space in the back ([Nº101 out of 169 ranked positions](#), among 999 electric vehicles, with some cars sharing positions).
- Max cargo capacity: Fold down the rear seats, and you open up 22.1 cubic feet of total cargo space ([Nº198 out of 204 ranked positions](#), among 999 electric vehicles, with some cars sharing positions).
- Frunk capacity: The front trunk is called a "frunk", and it offers an additional 10 cubic feet for storing small items.

## Is it suitable for towing? What is the maximum towing capacity?

The car isn't officially rated for towing.
