About MG IM5 Performance (2025-...)

Overview

The 2025 MG IM 5 Performance storms onto the scene as a seriously quick electric liftback, squaring up against premium rivals. This flagship model is all about blistering pace and cutting-edge technology, packaged in a sleek, aerodynamic design. Its key selling points are its stunning 3.0-second 0-60 mph sprint, a sophisticated 800-volt architecture for ultra-fast charging, and a tech-laden interior. While not officially priced for the US, expect it to be a compelling value proposition, likely landing in the \$80,000-\$90,000 range to challenge the establishment.

What's New for 2025?

As an all-new model for 2025, everything about the IM 5 Performance is fresh. It marks MG's ambitious entry into the high-performance EV sedan market, debuting a new platform built around an advanced 800-volt electrical system. This architecture is the secret sauce, enabling not only incredible performance but also some of the fastest charging speeds available. The IM 5 also introduces a new generation of interior technology, centered around a massive panoramic screen that spans the entire dashboard, setting a new benchmark for the brand.

Design & Exterior

The IM 5 Performance boasts a slippery, teardrop silhouette that screams efficiency and speed. Its liftback design is both stylish and practical, with clean lines, flush door handles, and an aggressive front fascia featuring sharp LED lighting. This performance trim gets unique aerodynamic wheels to complete the look. It's a substantial car, measuring 194.1 inches long, 77.2 inches wide, and a low-slung 58 inches tall, giving it a commanding and athletic stance on the road that is sure to turn heads.

Interior, Tech & Cargo

Step inside, and you're greeted by a futuristic, minimalist cabin dominated by a massive dash-spanning screen. The IM 5 Performance offers a premium feel with quality materials and excellent passenger space for five, thanks to a long wheelbase. The tech suite is comprehensive, featuring crisp graphics and standard smartphone integration. Practicality is solid for a sleek sedan; you get 16.1 cubic feet of trunk space, expanding to 45.6 with the seats down. There's even a small 0.6 cubic foot frunk for stashing charging cables.

Performance & Driving Experience

Hold on tight, because the IM 5 Performance is a rocket ship. Its dual-motor, all-wheel-drive setup, powered by twin PMSM motors, unleashes a colossal 742 horsepower and 592 lb-ft of torque. That's enough to launch this liftback from 0-60 mph in a breathtaking 3.0 seconds flat, with a top speed of 168 mph. Expect razor-sharp handling balanced with a comfortable ride, thanks to a sophisticated suspension. Multiple drive modes and adjustable regenerative braking will let you tailor the electrifying driving experience to your liking.

Range, Battery & Charging

The IM 5 Performance is powered by a 96.5 kWh usable battery pack, delivering a Green Cars Compare

estimated real-world range of 304 miles. It's impressively efficient, too, at 3.15 mi/kWh. Thanks to its 800V architecture, charging is a game-changer. It can suck down power at a peak of 369 kW, meaning a 10-80% charge could take under 20 minutes at a compatible station. For home charging via its CCS Type 1 port, the standard 11 kW onboard charger will replenish the battery overnight.

Safety & Driver-Assistance Features

While the MG IM 5 Performance has not yet been rated by the NHTSA or IIHS, it's expected to come loaded with a full suite of advanced safety tech. The top-tier Performance trim should feature a comprehensive driver-assistance package as standard. This includes adaptive cruise control with stop-and-go, lane-keeping assist, blind-spot monitoring with rear cross-traffic alert, and a high-resolution 360-degree camera system. Automatic emergency braking with pedestrian detection is also a key part of its safety arsenal, providing peace of mind.

Warranty & Maintenance Coverage

MG is expected to back the IM 5 Performance with a competitive warranty package for the US market. This would likely include a 4-year/50,000-mile basic limited warranty, covering the entire vehicle. The crucial battery and drivetrain components should receive an 8-year/100,000-mile warranty, with a guarantee to retain at least 70% of the original battery capacity. As with most EVs, maintenance is minimal, focusing on tires, brakes, and cabin air filters, making for low running costs over the ownership period.

How powerful is it? How fast does it accelerate?

The MG IM5 Performance (2025-...) can accelerate from 0 to 60 mph in 3 seconds ([Nº14 out of 119 ranked positions](#), among 995 electric vehicles, with some cars sharing positions) and reach a top speed of 168 mph.

The car's powertrain delivers up to 553 kW (742 hp) of power and 592 lb-ft of torque.

How far can it go on single charge? What is the real-world range?

Real-world range of the MG IM5 Performance (2025-...) is 304 miles ([Nº76 out of 268 ranked positions](#), among 995 electric vehicles, with some cars sharing positions) — depending on several factors, including:

- Speed: Higher speeds deplete the battery faster.
- Temperature: Extreme cold and hot weather impacts range.
- Terrain: Hilly or mountainous terrain reduces range.
- Driving style: Aggressive driving with frequent acceleration and braking consumes more energy.
- Use of features: Features like climate control and media system also affect range.

It's important to remember that these are just estimates, and your actual range may vary. It's always best to factor in these various factors when planning your trip and be prepared for potential charging stops.

What charging options are available? How long does it take to charge it?

In the USA MG IM5 Performance (2025-...) has a CCS Type 2 charge port.

- You can charge it at home using a standard domestic socket or plug into any public AC charging station using the right cable. Keep in mind that the car's on-board charger (inverter) limits the maximum AC charging rate to 11 kW, which translates to approximately 31 miles of range added per hour of charging.
- For quicker charging, consider using a compatible DC fast-charging station. The car boasts a maximum charging rate of 369 kW, but remember that battery temperature and charge level can influence the actual speed you'll experience.

How big is it? What are the dimensions (length, width, height)?

Here are the dimensions and weight for the MG IM5 Performance (2025-...):

- Length: 194.1 in
- Width: in (including side mirrors) or 77.2 in (excluding side mirrors)
- Height: 58 in
- Wheelbase: 116.1 in (distance between the center of the front and rear wheels)
- Curb weight: 5066 lbs (weight of the empty car, no people or cargo)

How much cargo space does it offer? Does it have a front trunk?

Here's a breakdown of the MG IM5 Performance (2025-...) cargo space:

- Trunk capacity: With the rear seats up, you get 16.1 cubic feet of cargo space in the back ([Nº101 out of 169 ranked positions](#), among 995 electric vehicles, with some cars sharing positions).
- Max cargo capacity: Fold down the rear seats, and you open up 45.6 cubic feet of total cargo space ([Nº132 out of 203 ranked positions](#), among 995 electric vehicles, with some cars sharing positions).
- Frunk capacity: The front trunk is called a "frunk", and it offers an additional 0.6 cubic feet for storing small items.

Is it suitable for towing? What is the maximum towing capacity?

The car isn't officially rated for towing.
