## How powerful is it? How fast does it accelerate?

The Tesla Cybertruck Cyberbeast is equipped with a powertrain that delivers up to 630 kW (845 hp) of power and 740 lb-ft of torque.

This enables a 0 to 60 mph acceleration in 2.6 seconds (ranked N°18 out of 683 electric vehicles) and a top speed of 130 mph.

## How far can it go on single charge? What is the real-world range?

Real-world range of the Tesla Cybertruck Cyberbeast is 288–352 miles (ranked N°78 out of 683 electric vehicles) — depending on several factors, including:

- Speed: Higher speeds deplete the battery faster.
- Temperature: Extreme cold and hot weather impacts range.
- Terrain: Hilly or mountainous terrain reduces range.
- Driving style: Aggressive driving with frequent acceleration and braking consumes more energy.
- Use of features: Features like climate control and media system also affect range.

It's important to remember that these are just estimates, and your actual range may vary. It's always best to factor in these various factors when planning your trip and be prepared for potential charging stops.
